8 Admonition blocks

If you write admonition blocks, they are translated into something similar in latex.

Example

9 Code blocks

```
print("this is a code block")  
print("this is another code block")
```

10 Cross-reference of section

Check [this section](#) ([section 5](#)) about adding citations.

12 Assume sections from embedded notes

The sections from embedded notes can assume the hierarchy of the file wherein they are embedded.

note

Notice in the latex file that the section hierarchy has been modified to adhere to the hierarchy of the file that embeds the note.

15 Latex commands

When there is something niche, or some translation functionality that hasn't been developed yet, you can write a latex command within the code-block functionality of Obsidian, and the translator will not touch it. Use the syntax according to the following example:

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada

eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus.
